

Why on earth would you want to make it easier for any entity to harass or otherwise make unwanted contact either by phone, internet, or mail? Put us down as absolutely no to weakened restrictions on the 'Do Not Call List'. If anything make it stronger. Don't allow any business access to any of our private information, excluding political, religious, or non-profit organizations. We should have the right to limit our contact to people from our church or political party at our discretion. That is one clear definition of freedom. Thank you for the opportunity to express this comment.
